PELICAN LEADS

Pelican International is a world leader in the design and manufacture of kayaks, canoes, pedal boats and fishing boats. For over 40 years we have leveraged our mastery of thermoforming to deliver durable, quality products at affordable prices. A commitment to innovation, investment in state of the art technology and rigorous quality control standards are the cornerstones of our business philosophy. Our guiding principal is simple and enduring: to bring quality products within reach of all outdoor enthusiasts.

PELICAN INNOVATES

RAM-X is a multi-layer material exclusive to Pelican. It is known for its high impact-resistance, its ability to regain its initial shape after violent impacts and its UV-protected exterior finish. RAM-X has become the benchmark of quality in the industry.

Impact resistant, high density RAM-X™ layers

Pelican is the only North American kayak manufacturer to use Twin Sheet Thermoforming (TST) technology. TST produces a stiffer, stronger, lighter product than is possible with other manufacturing methods.

The combination of Pelican's proprietary materials combined with the TST process results in a lightweight product that has unparalleled rigidity, exceptional impact and breakage resistance, outstanding longevity and superior safety.

PELICAN CARES

We create products that enable our customers to discover and delight in the outdoors, so we care about our impact on the environment.

Here are some ways we help:

We recycle more than 99% of the plastic waste generated during the manufacturing process. Furthermore, 50% of the boats we manufacture use post industrial recycled plastic.

Specially designed air ducts redirect heat released by the ovens during the molding process in order to heat the factory during the winter months.

Whether it's for a day of family fun, a romantic sunset paddle or a trek to your favourite fishing spot, Pelican has the perfect boat for you. See you on the water!
